

Steve Lybbert

I have lived in the United Irrigation District area most of my life. I grew up on a dairy farm in the north-west corner of the District where irrigation water was used for production of crops and for raising livestock.

I started with the UID in construction in 2003. In August 2006 I became the Ditch Rider for the east end of the District where I kept the water running to 107 pivot systems along with some wheel lines and flood parcels.

I really like working with the irrigators and delivering water.
